

Educator Reflection

Reflections allows the Educators to ponder, as a team, on the observations made during the site visit and to reflect on their approach of responding to every child's unique needs, promoting an inclusive environment, building relationships and partnerships with families, their children and other professionals within the community.

Reflections allows Educators to dig deeper on establishing learning environments that promote the foundations and pedagogical approaches of HDLH?, understanding what children learn and so much more.

- How do we motivate children to expand their learning opportunities?
- How do we involve parents meaningfully in learning experiences?
