

# Supervisor's Reflection

Reflections allows the Supervisor to ponder on the observations made and to reflect on how the Educators may be better supported throughout this journey. It also provides the Supervisor opportunity to reflect on the Team's approach to responding to every child and family's needs and how the team can be better supported.

Conversation, reflection, planning and goal setting with all team members are an essential part in supporting the implementation and ongoing practices related to the foundations and pedagogical approach.

- How can I as the Supervisor support my team?
- How can we provide an inclusive environment?
- What tools and materials can I share with the team?
